

Barker Ryan Stewart

Position Description

Civil Engineer – Sydney

Barker Ryan Stewart are experiencing significant growth and require the services of a full time experienced Civil Engineer to join our team.

Our Sydney office provides planning, infrastructure, sustainability, development and Private Certification services to Sydney and the surrounding region.

The role will provide an opportunity to work within an innovative and dynamic multi-disciplinary consultancy with excellent professional development opportunities.

The Role

Reporting directly to a Director.

Undertake inspection of works for subdivisions and developments.

Attend meetings and liaise with local and state government officers, external consultants, contractors, clients, and other stake holders.

Design checking and assessment of civil engineering designs for the issue of Construction Certificates.

Essential:

A degree in Civil Engineering acceptable for membership of Engineers Australia with a minimum of 5 years relevant experience.

Previous experience in road and drainage construction supervision.

Possess a strong client focus.

Be able to work independently and proactively.

Sound verbal and written communication skills.

Strong work ethic and commitment to Barker Ryan Stewarts core values.

A current drivers licence.

Desirable:

Experience in working as a Development Engineer in Local Government.

Experience with the Development Application and Construction Certificate design assessment process.
